

## **Blue Moon Receives Multi-Year Drill Permit to Further De-Risk its 100% Controlled Zinc Project**

**July 20, 2018 – Blue Moon Zinc Corp. (TSXV: MOON; US: BMOOF)** (the “Company”) is pleased to announce it has received all necessary drill permits for its planned exploration and development programs at its advanced Blue Moon Zinc Deposit. The multi-year drill permit provides for the development until June 2022, including extensions, to complete further drilling.

*"The receipt of the drill permit is a significant milestone for the Company and represents the government and community support for the continued exploration and development of the Blue Moon Deposit. We continue to reach new milestones at the project, as we look to further de-risk the deposit and highlight the robust nature of the high-grade resource,"* stated **Patrick McGrath, Chief Executive Officer of Blue Moon Zinc**. *"Our technical team has identified new drill targets and potential new zones through the analysis of historical data to further enhance and expand the known resource at the project. We will look to update the market shortly on timing and focus of the Phase One drill program, and I would like to thank our shareholders for their patience as we systematically and methodically advance the project."*

### **About Blue Moon**

The Company is currently advancing its 100% controlled Blue Moon Polymetallic Zinc Deposit, which also contains significant credits of copper, silver and gold. The deposit, which is open at depth and along strike, yields historical metallurgical testing that indicates excellent mineral recovery and a clean zinc concentrate. A NI 43-101 technical report detailing the geological resource and summarizing metallurgical recoveries is available on the company's website ([www.bluemoonmining.com](http://www.bluemoonmining.com)), and filed on SEDAR on November 13, 2017. The Company plans to advance the Blue Moon project through to feasibility, permitting and ultimately production.
